

THE ONE HOUR PITCH

SNAP IN SHAPE

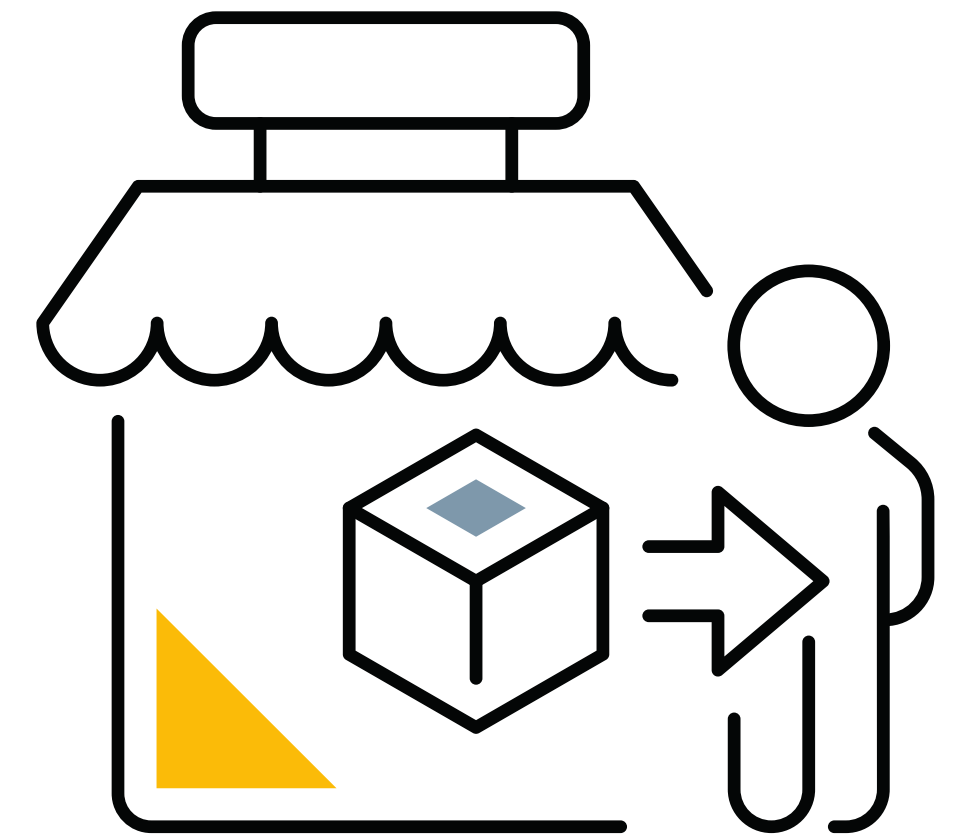

This app uses AR technology to turn our device into a measuring tape. We will now have the option to throw those old-fashioned, awkward measuring tapes.

It will mainly cater to the designers and the impulsive buyers.

Designers: Even if you forget to take a measuring tape along with you, you'll have "Snap in Shape" with you to solve your problem!

Impulsive Buyers: Because these people make unplanned purchases and at the time of covid, not everybody would want to try out clothes so this app will help measure the garment sizes for them.
